

Premium pads for interior and exterior applications

Hanno®-Flashing Tape DUO Easy Pads

* Basic tape DUO Easy 240

Fast and practical

Did you know? The versatile Hanno®-Flashing Tape DUO Easy is also available in roll format with individually peelable pads. These convenient stickers can be applied quickly and easily on the construction site.

Hanno®-Flashing Tape DUO Easy consists of a modified polyamide film/non-woven combination. The fully self-adhesive surface allows a quick and easy installation of the flashing tape, which may be plastered or painted over and does not require any additional adhesion on the masonry.

Hanno®-Flashing Tape DUO Easy was developed especially for curtain-type window elements often used for energy efficient constructions. It is moisture-variable and therefore can be used both inside and outside.

The high water tightness in heavy rain of ≥ 1050 Pa prevents the penetration of moisture on the weather side. On the inside, the important airtightness is achieved with an a_n value of < 0.1 .

Whether in roll format or as pads – Hanno®-Flashing Tape DUO Easy is always the right choice!

Properties

- Roll material with individually peelable pads
- For interior and exterior use
- Moisture-variable
- High air tightness: a_n value of < 0.1
- High water tightness: resistance to driving rain (EN 1027 ≥ 1050 Pa, MPA)
- Self-adhering on all typical construction substrates
- High adhesive strength without additional foil adhesive
- Quick and easy application
- UV stable for 12 months (in Central European climate zone)
- Resistance to water penetration according to EN 1928
