

Enjoy the silence

Reduce sound effectively –
with HANNO!

The HANNO advantages at a glance

- Sound insulation allows dense construction
- Flexibility in urban and building planning
- More acoustic comfort for living and working spaces
- Effective filtration of dust particles from the air
- Many years of experience for comprehensive acoustic expertise

Products for appliance construction

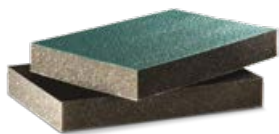

Quiet ventilation and effectively filtered air – HANNO products are used in air-conditioning, heating and ventilation systems. This creates the conditions for a more pleasant room acoustic environment and greater acoustic comfort. Wind turbines, heat pumps, air-conditioning units and ventilation systems are potential sources of noise. When fitted with sound-absorbing material, this disturbing noise can be effectively reduced. Even with fans, where airborne noise cannot be avoided, the right insulation materials can enable quieter operation.

- Do you want to effectively reduce airborne and structure-borne noise?
- Do you want to filter sand, fluids and air?
- Do you want to install seals?

Then we particularly recommend these products:

Easy-to-clean surfaces

Hanno®-Protecto

Highly absorbent special foams. The surfaces are designed for a wide range of problems (e.g. aluminum lamination, skinning).

Covered applications

Hanno®-HW 30 sfl / HW 37 dbl

HANNO's raw foams have good UV resistance (polyester foam) or good hydrolysis resistance (polyether foam).

Liquid sealing

Hanno®-PE-Foams

These foams are characterized by a particularly high resistance to hydrolysis and chemical resistance.

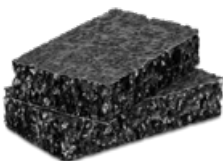

Seals

Hanno®-Cellular Rubber

The closed-cell, soft-elastic cellular rubber is particularly suitable for elastic seals of various types. HANNO offers a wide range of qualities for various areas of application.

Exterior applications

Hanno®-HW 50 SuperDry

For applications in damp and wet areas. The closed-cell, coarse-cell polyethylene foam is also available UV-stabilized.

Filtering sand / fluids

Hanno®-Filter Foam

Polyester-based PUR foam with an open-cell and regular pore structure. Elastic and tolerance-compensating.

Sound absorption. Flame retardant. Lightweight.

Hanno®-Tect

Lightweight, sound-absorbing, flame-retardant and thermally insulating – Hanno®-Tect is available in many product variants (e.g. with an aluminum foil, oleophobic / hydrophobic adjustable).

No intentional use of PFAS

Hanno®-Tect-F-free

Reliably sound-absorbing and hydrophobic – manufactured without the intentional use of PFAS.
