## Declaration of Conformity – REACH/SVHC

Dear Sir or Madam,

We declare the content of our products (articles) on the basis of following EC regulation:

1907/2006 (REACH), SVHC candidate list from 14.06.2023

Our products and the involved packaging do not contain substances of the SVHC candidate list (dated 14.06.2023) according to Art. 59 (1) of the REACH Regulation of more than 0.1% by mass.

With regard to the REACH regulation HANNO WERK GmbH & Co.KG is a producer of materials for joint sealing and sound insulation and therefore a "downstream user" of chemical substances and preparations. The products manufactured by HANNO are "articles" according to regulation (EC) 1907/2006 (REACH). These are not subject to registration and cannot be registered, since only substances can be registered under REACH.

According to Art. 33 REACH, we are obliged to inform our customers about the presence of substances from the SVHC list (substances of very high concern) in a concentration of > 0.1% by mass. Further declarations about the presence of such substances are not necessary on our part, since our suppliers have no information about the existence of SVHC substances in primary materials. In the case of information about SVHC substances in primary materials from suppliers, we automatically take action and comply with the statutory information obligation for you without being asked. Basically, we rely on the latest information from our suppliers. Laboratory tests are not carried out in this regard in our house.

This statement is based on the laws and regulations in force at the present time. It was created by Hanno Werk GmbH & Co.KG at the time of creation to the best of our knowledge and current knowledge.

Mit freundlichen Grüßen/ With kind regards

Dr. Andreas Hohlfeld  
Head of R&D

Dr. Martin Hesse  
Hazardous Substances Officer
